

# Architectural Concepts IRRIGATION

Yes, it is that time of year again, and spring has sprung!

Now is a good time to have a **SPRING START-UP** done to your irrigation system.

With the spring start-up, we will check all the components to ensure your system is fully functional for the watering season. This service includes:

- Turn water on to the sprinkler system and inspect sprinkler plumbing and vacuum breaker.
- Activate the controller, set watering schedule and test all valves in the system.
- Inspect and adjust the system for proper coverage.
- Check for system leaks.
- Check function of all heads and nozzles.

**Spring start-up pricing \$55.00**

Schedule a spring start up with [Architectural Concepts Irrigation](#), and you will receive a \$10.00 discount on the end of the year blow-out.

This means you only pay \$45.00 for an end of the year blow-out.
